House Keeping Rules

- ❖ Usage of Teams Webinar with mandatory registration
- ❖ Use the Q&A tool for questions
- ❖ Entire session is being recorded
- ❖ Slides will be available on GitHub 
- ❖ Recording will be available on  **YouTube**
- ❖ Frequency of roundtables: monthly, only one session for all time zones

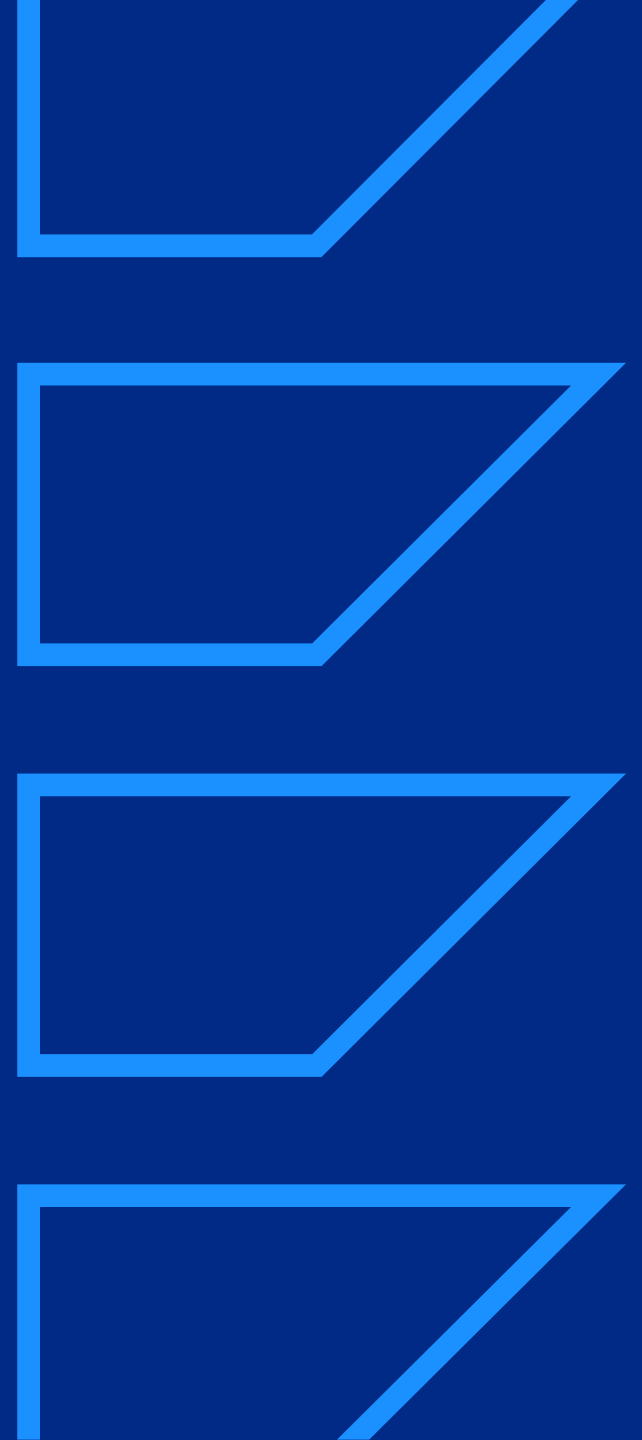

Agenda

01 What's New in May/June

- ## 02 Demo:
- btp CLI/Terraform Integration into the BTP Cockpit
 - Good practices for importing Terraform resources
-

03 Follow-up on questions from last roundtable

04 Q + A

Meet the team

Christian Lechner
Product Manager

Matthias Gradl
Topic Owner (btp CLI)

Vipin VijayKumar
Development Lead (Terraform)

Ana Miranda
Software Engineer (btp CLI)

Anugrah Gupta
Software Engineer (Terraform)

**Diya Dhandapani
Shanmugam**
Software Engineer (Terraform)

Eckart Langhuth
Software Engineer (btp CLI)

Mathias Kinzler
Software Engineer (btp CLI)

Nikolai Kriuchkov
Software Engineer (btp CLI)

Sachin Prajapat
Software Engineer (Terraform)

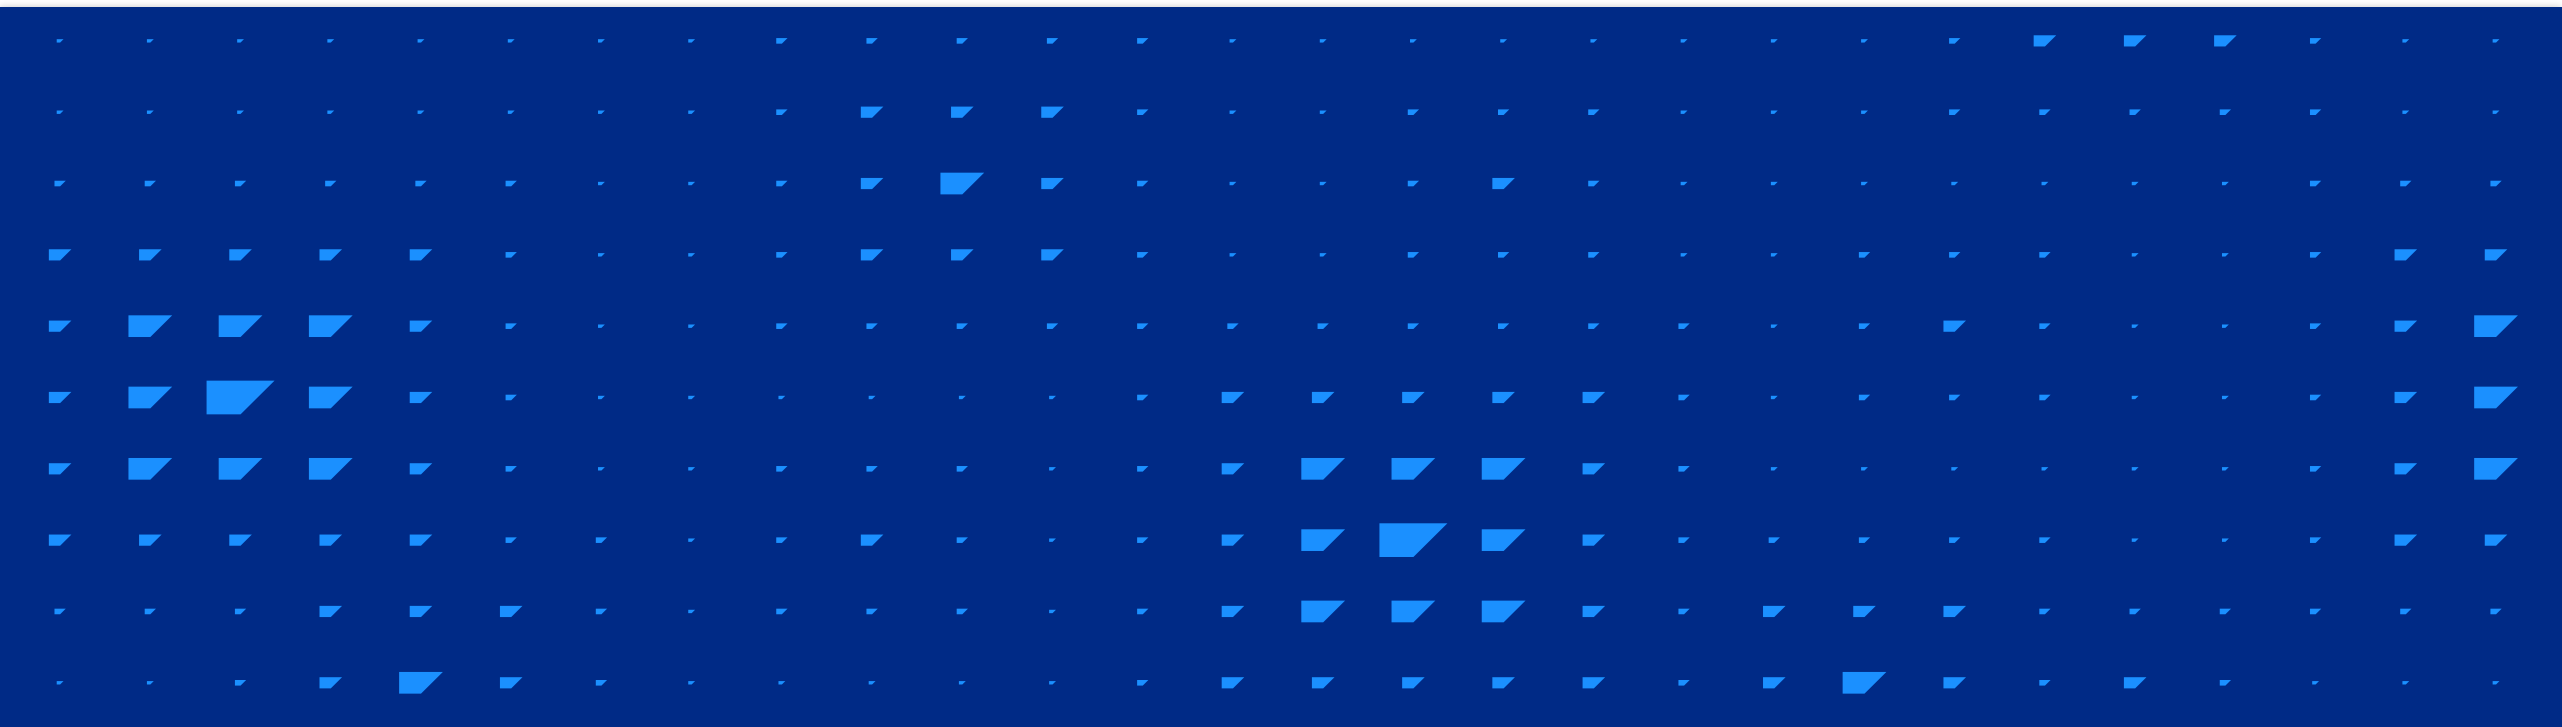

Ravi Yadav
Software Engineer (Terraform)

Sarthak Goyal
Software Engineer (Terraform)

What's new in May/June 2026

What's new in May/June – Terraform

01

New Provider for Service-Specific Configurations

(starting with CI/CD service - [Link](#))

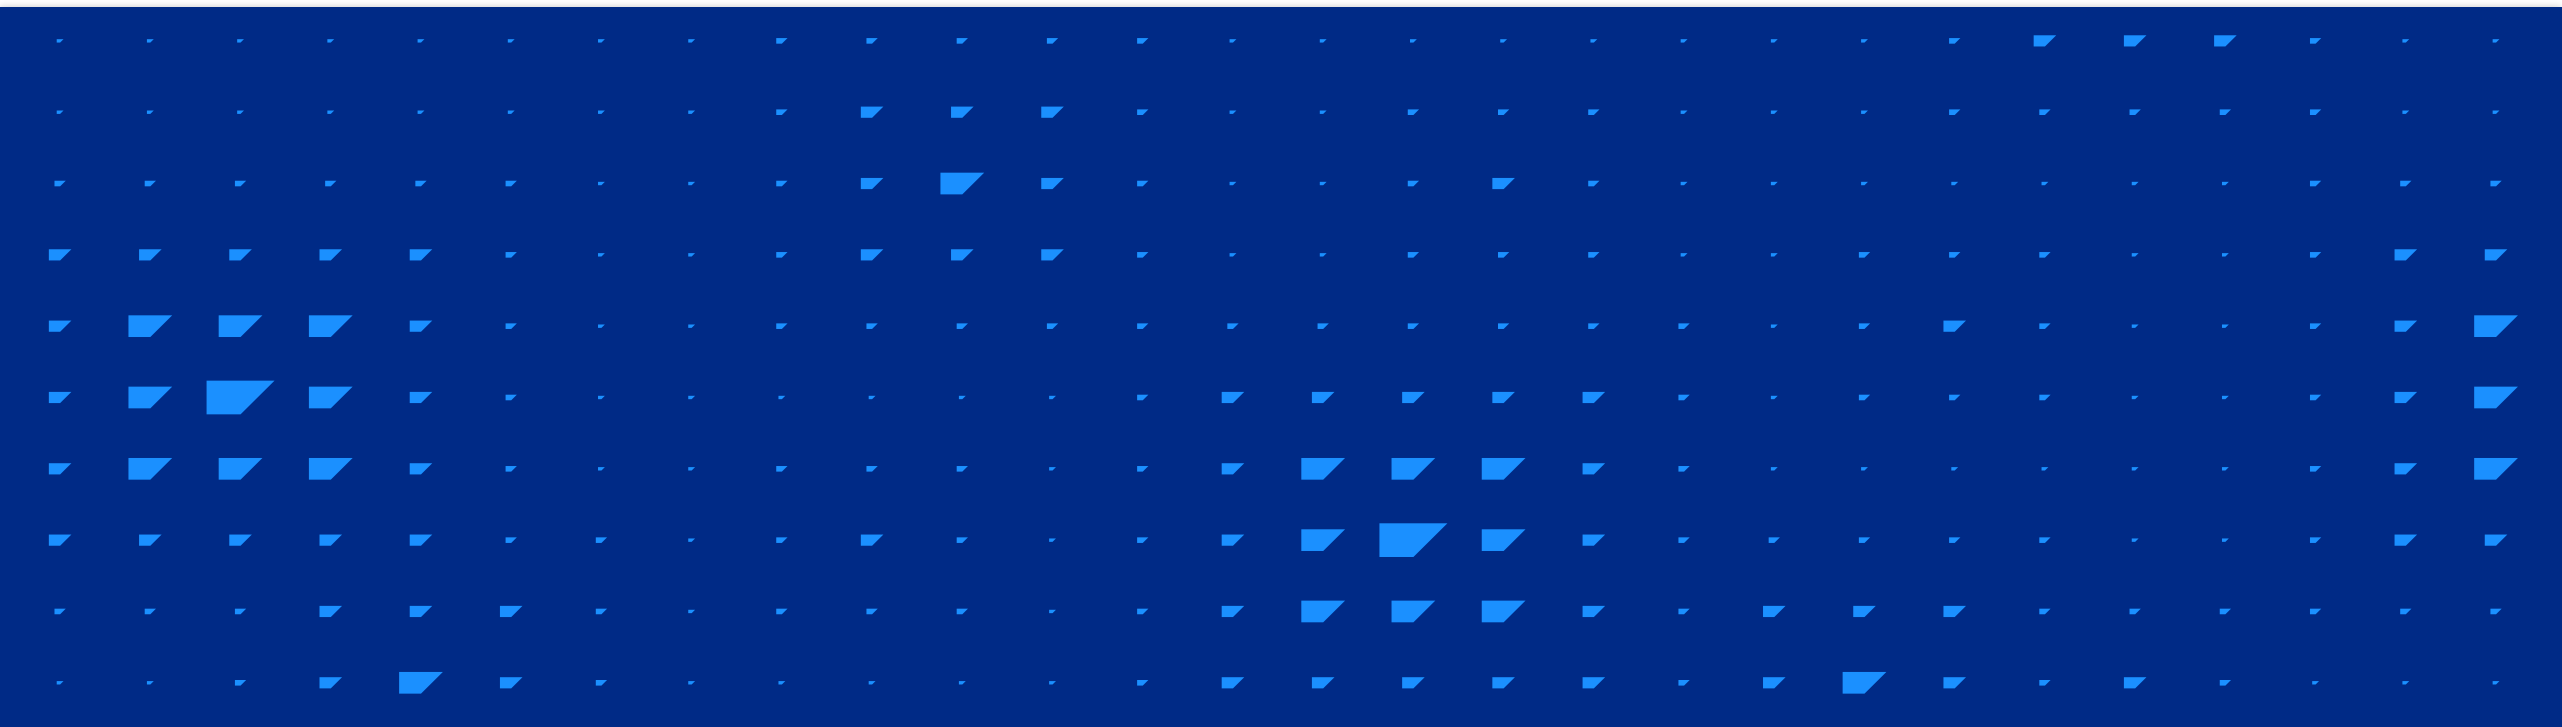

02

Fix for JWT token expiry in the Terraform Provider for Cloud Foundry

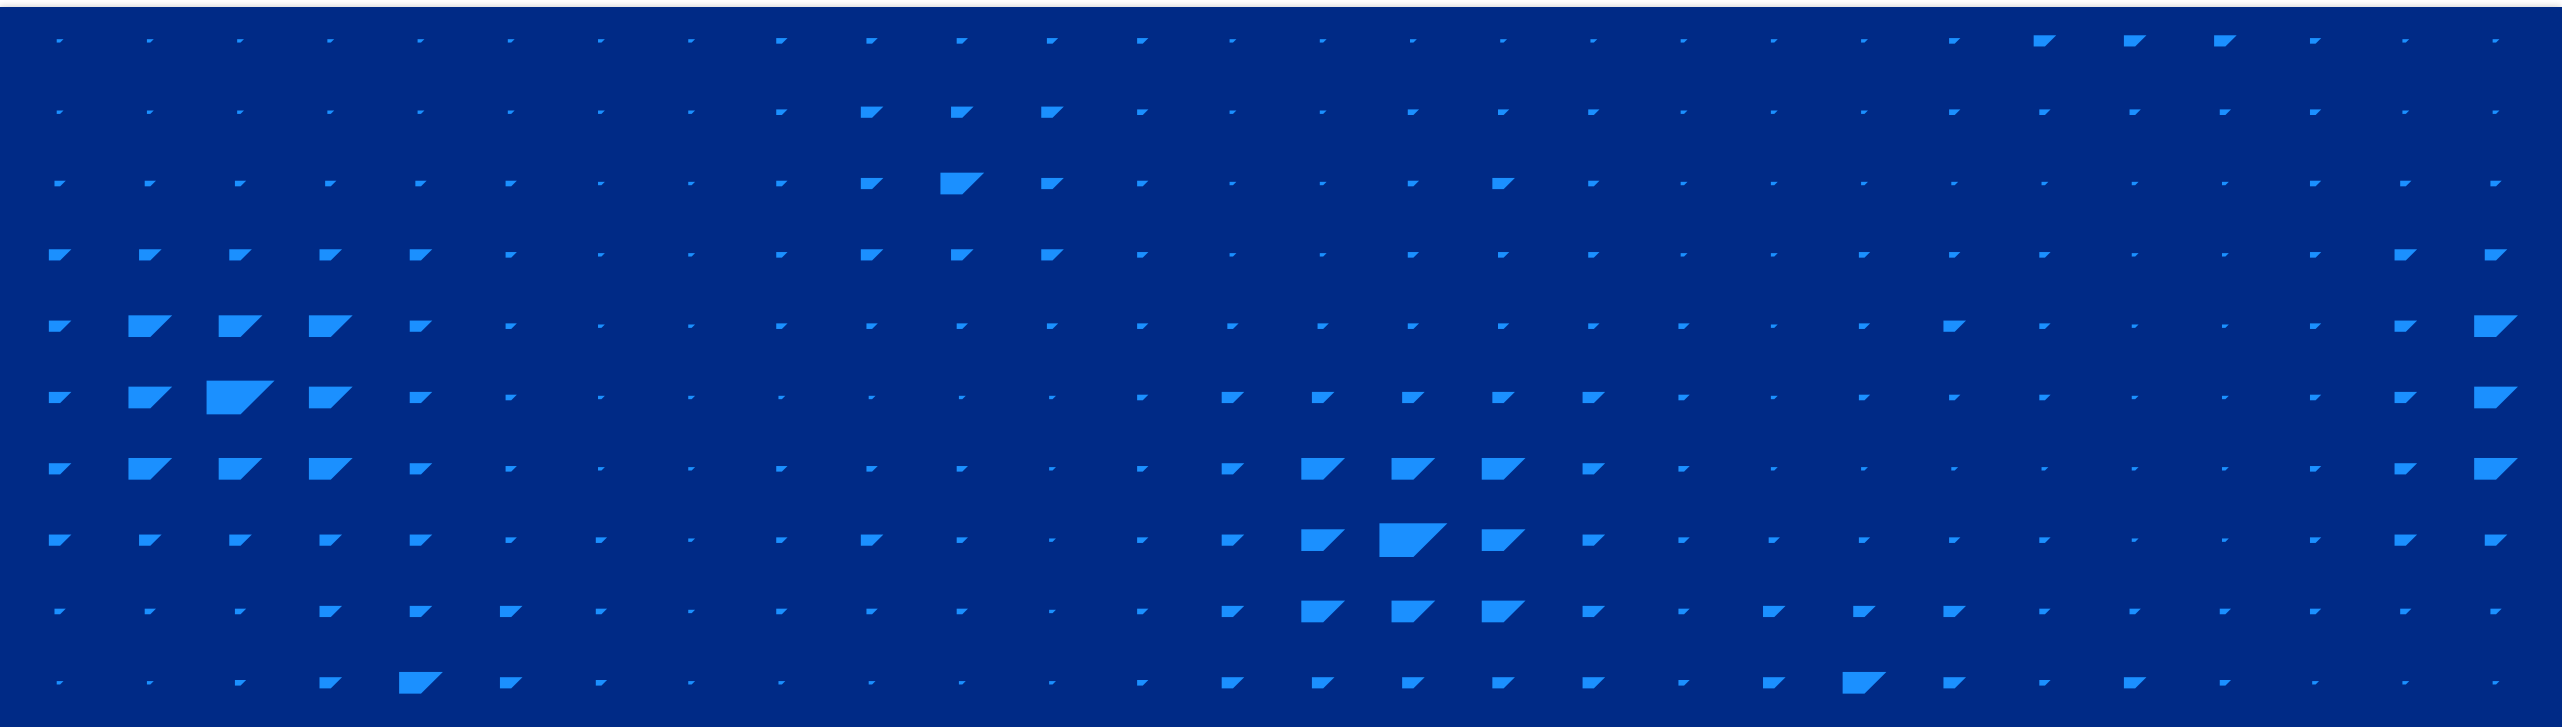

03

Module for role collection assignment ([Link](#))

Sneak Peek: CLI and Terraform Integration into the SAP BTP Cockpit

Special – Good practices for importing Terraform resources

Import via Terraform

Terraform **standard** functionality

It **works** 😊

No semantic knowledge (explicit dependencies)

Nice enhancement via **Terraform queries**

Import via Terraform - Limitations

Every Terraform provider has **limitations** with regards to imports

Some resources might **not support** import at all

Some resources might **have restrictions** due to the underlying API

These **limitations are documented** in the provider repositories (e.g., <https://github.com/SAP/terraform-provider-btp/blob/main/guides/IMPORT.md>)

Scenario: Partially managed

Iterative approach is **king**

Analyze + **Clean Up** (btp CLI): can resources be removed?

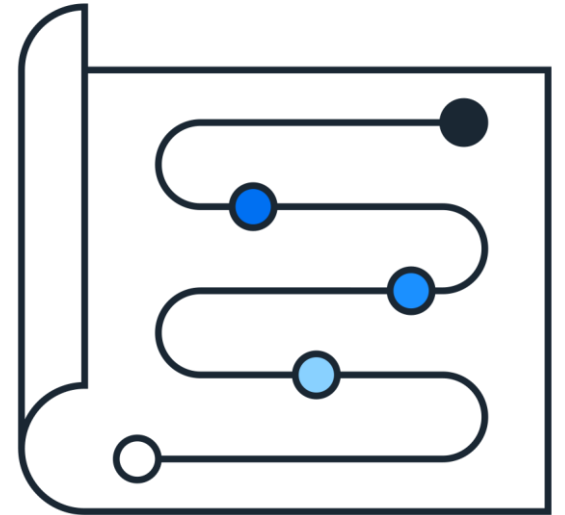

Determine unmanaged resources:

→ Terraform State + Terraform Query

Import (missing) resources:

→ Terraform Exporter for SAP BTP / Terraform Query

If required: **Align with policies, conventions ...**

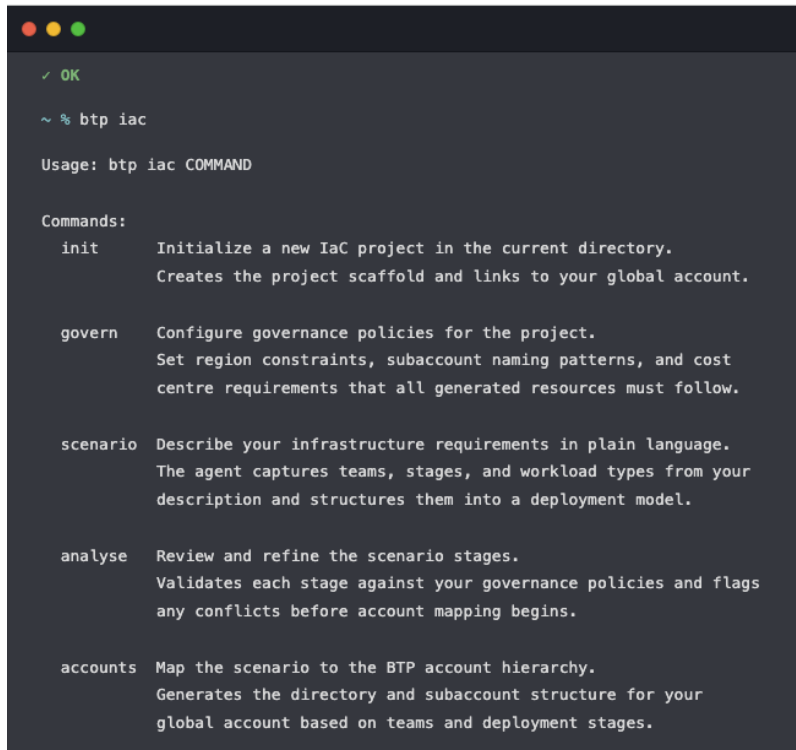

Follow-up: open questions from last roundtable

- Service instance sharing for user provided services:
<https://github.com/cloudfoundry/terraform-provider-cloudfoundry/discussions/510>
- “Dynamic Hardening” of Cloud Connector based on usage telemetry
 - Was not yet requested and is not planned
 - ➔ Please open an influence request
<https://influence.sap.com/sap/ino/#/campaign/2277>

Call to Action

Who is interested in validating our **Spec-Driven Development Tool** Design (Mock-up)?

```
✓ OK

~ % btp iac

Usage: btp iac COMMAND

Commands:
  init      Initialize a new IaC project in the current directory.
            Creates the project scaffold and links to your global account.

  govern    Configure governance policies for the project.
            Set region constraints, subaccount naming patterns, and cost
            centre requirements that all generated resources must follow.

  scenario  Describe your infrastructure requirements in plain language.
            The agent captures teams, stages, and workload types from your
            description and structures them into a deployment model.

  analyse   Review and refine the scenario stages.
            Validates each stage against your governance policies and flags
            any conflicts before account mapping begins.

  accounts  Map the scenario to the BTP account hierarchy.
            Generates the directory and subaccount structure for your
            global account based on teams and deployment stages.
```

→ Ping me: christian.lechner@sap.com

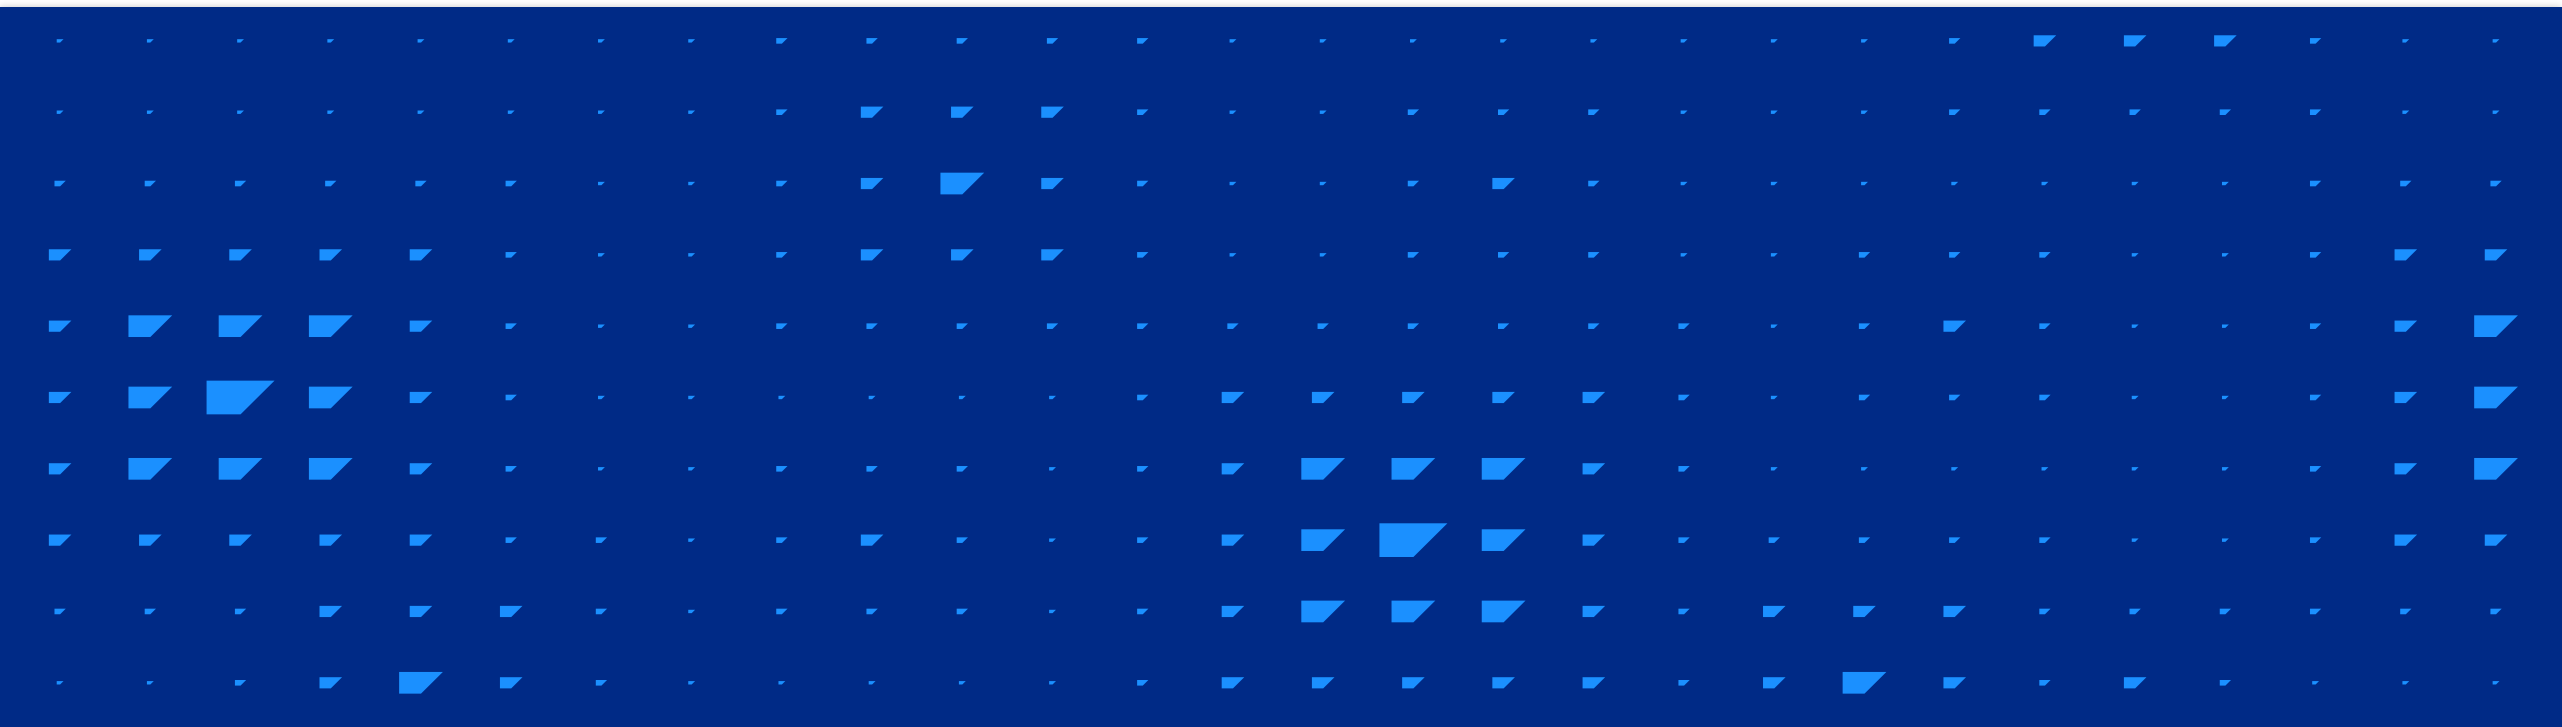

Call to Action

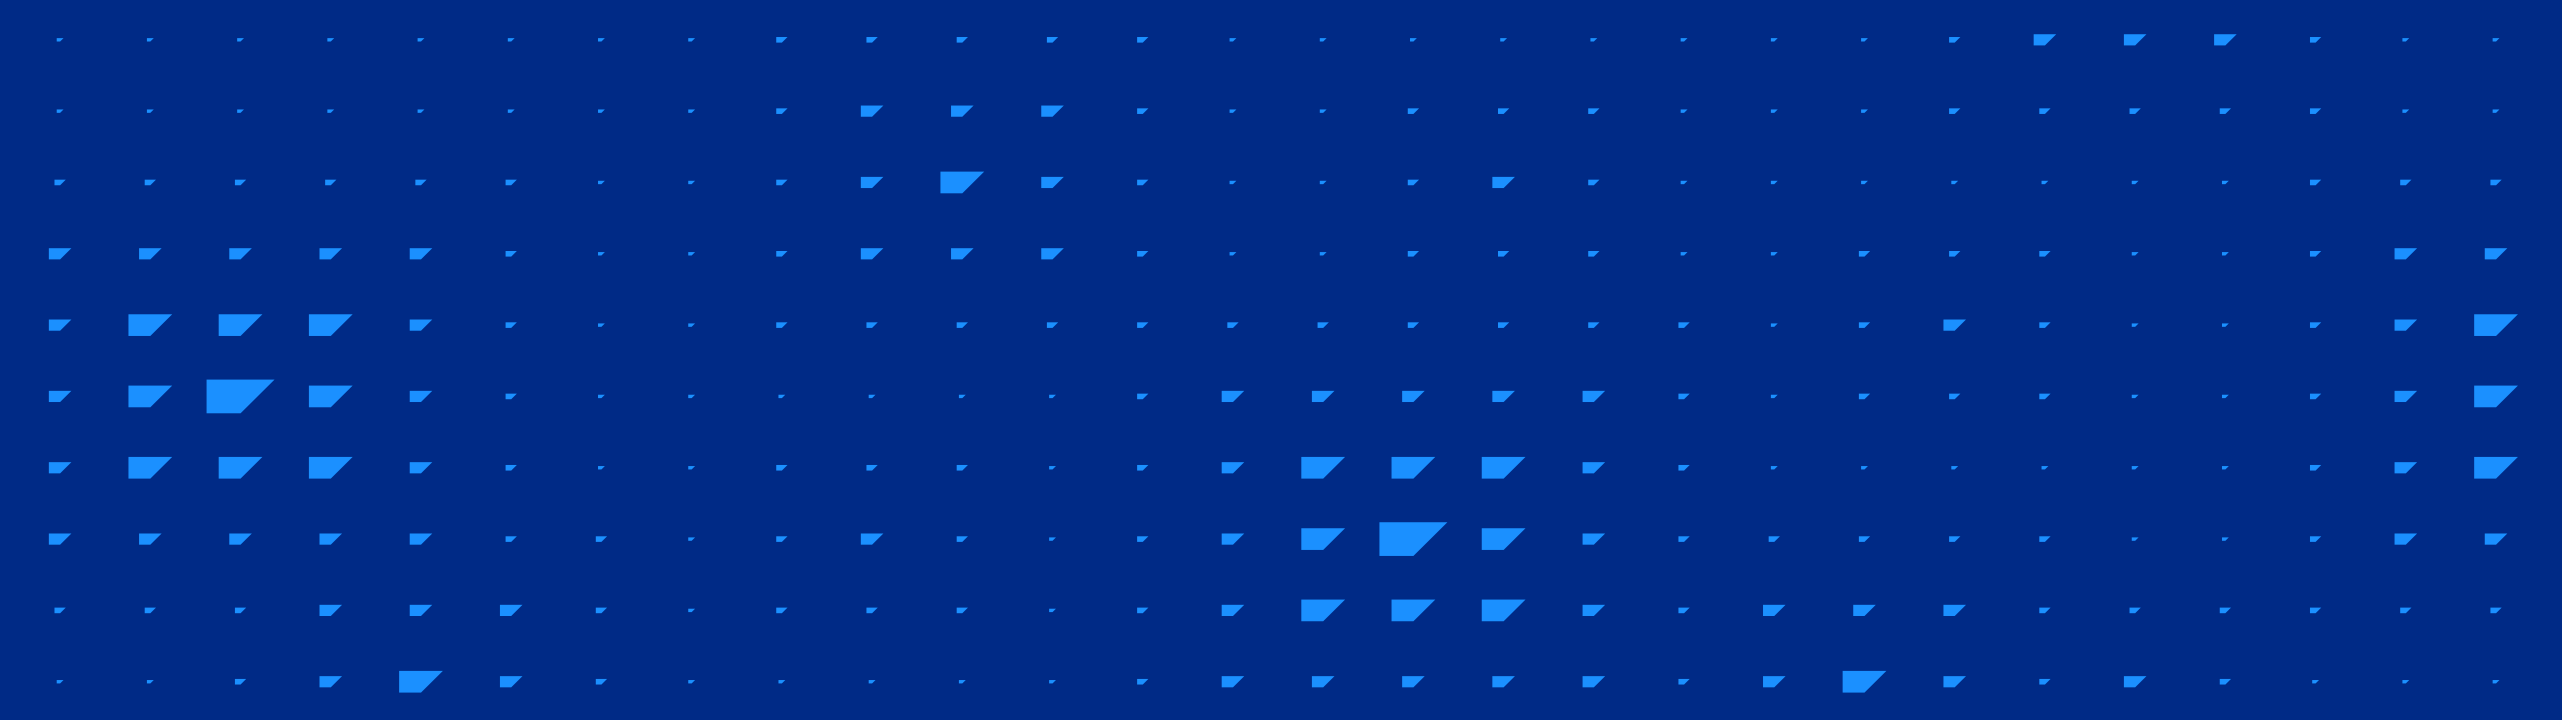

**We would love to hear your story with
btp CLI and/or Terraform!**

**Would you like to share it in an upcoming
roundtable session?**

Ping me: christian.lechner@sap.com

Q + A

Thank you.

Christian Lechner
Product Manager
