What's new in April – Terraform

01

Lists in Terraform Provider for **Cloud Foundry**

02

Service Instance Creation via **Offering and Plan Name** (BTP)

Demo

03

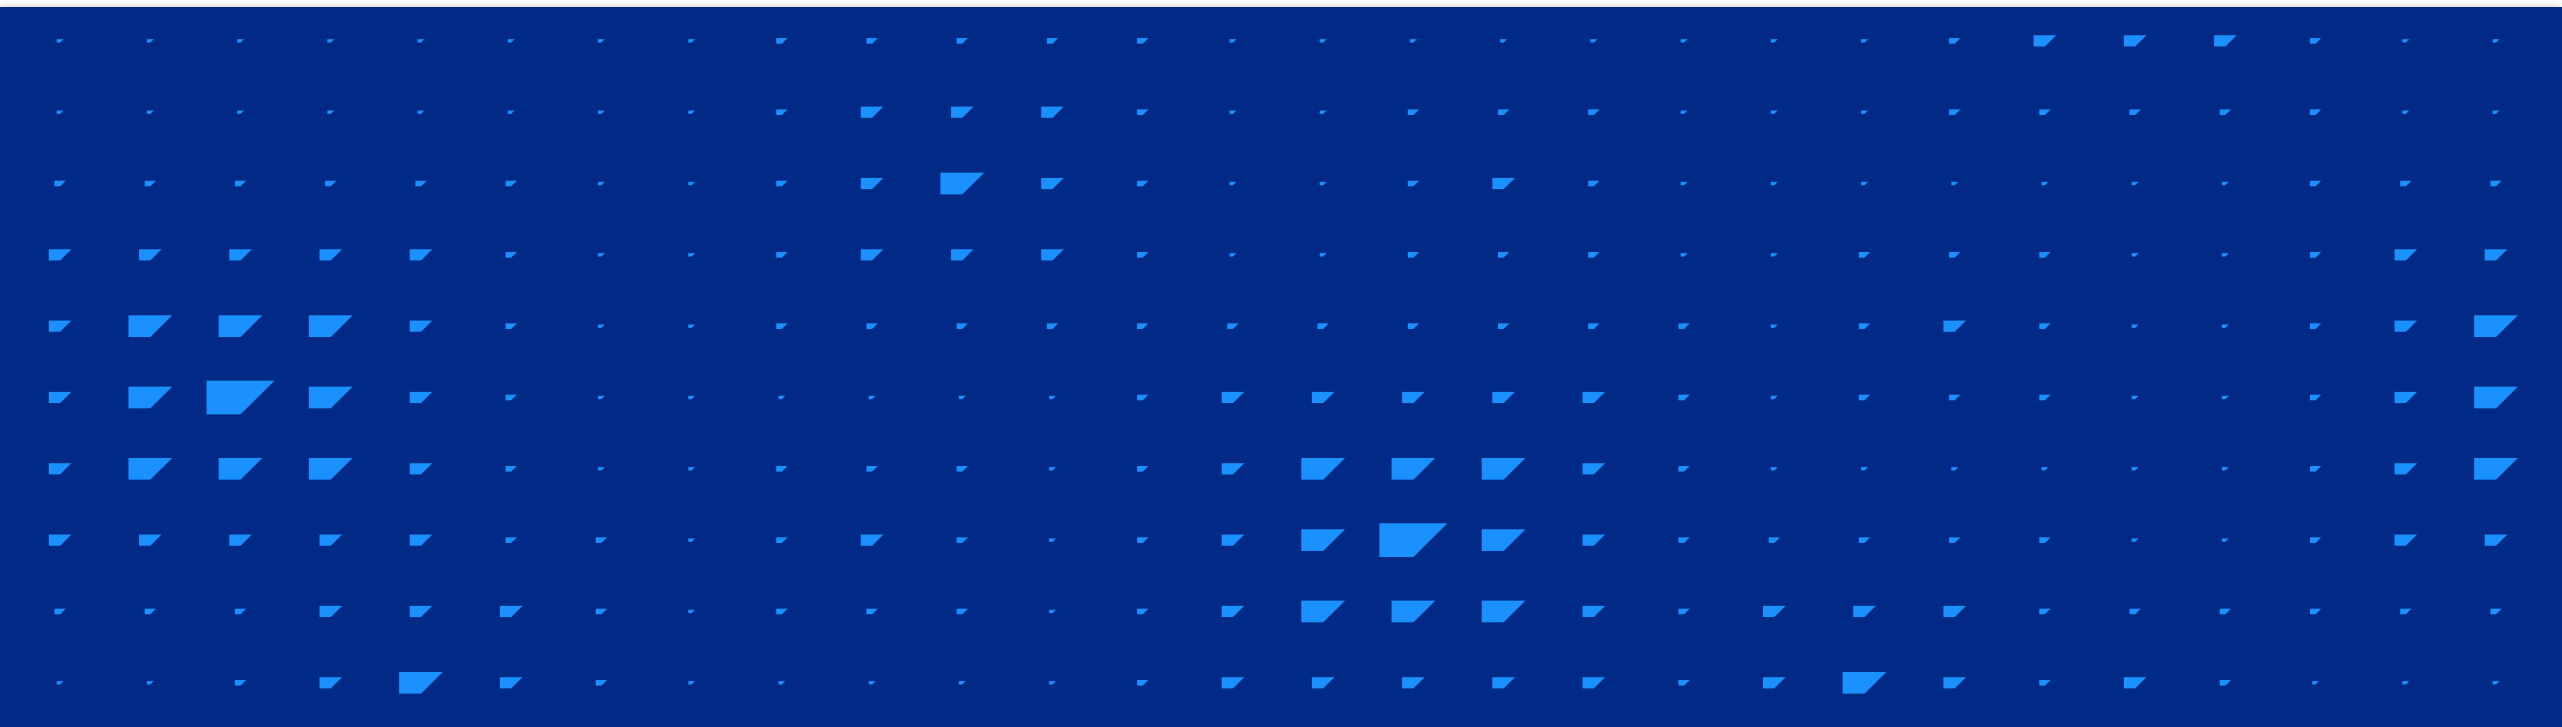

Pending Deletion of Subaccounts and **Action for restoring** (BTP)

04

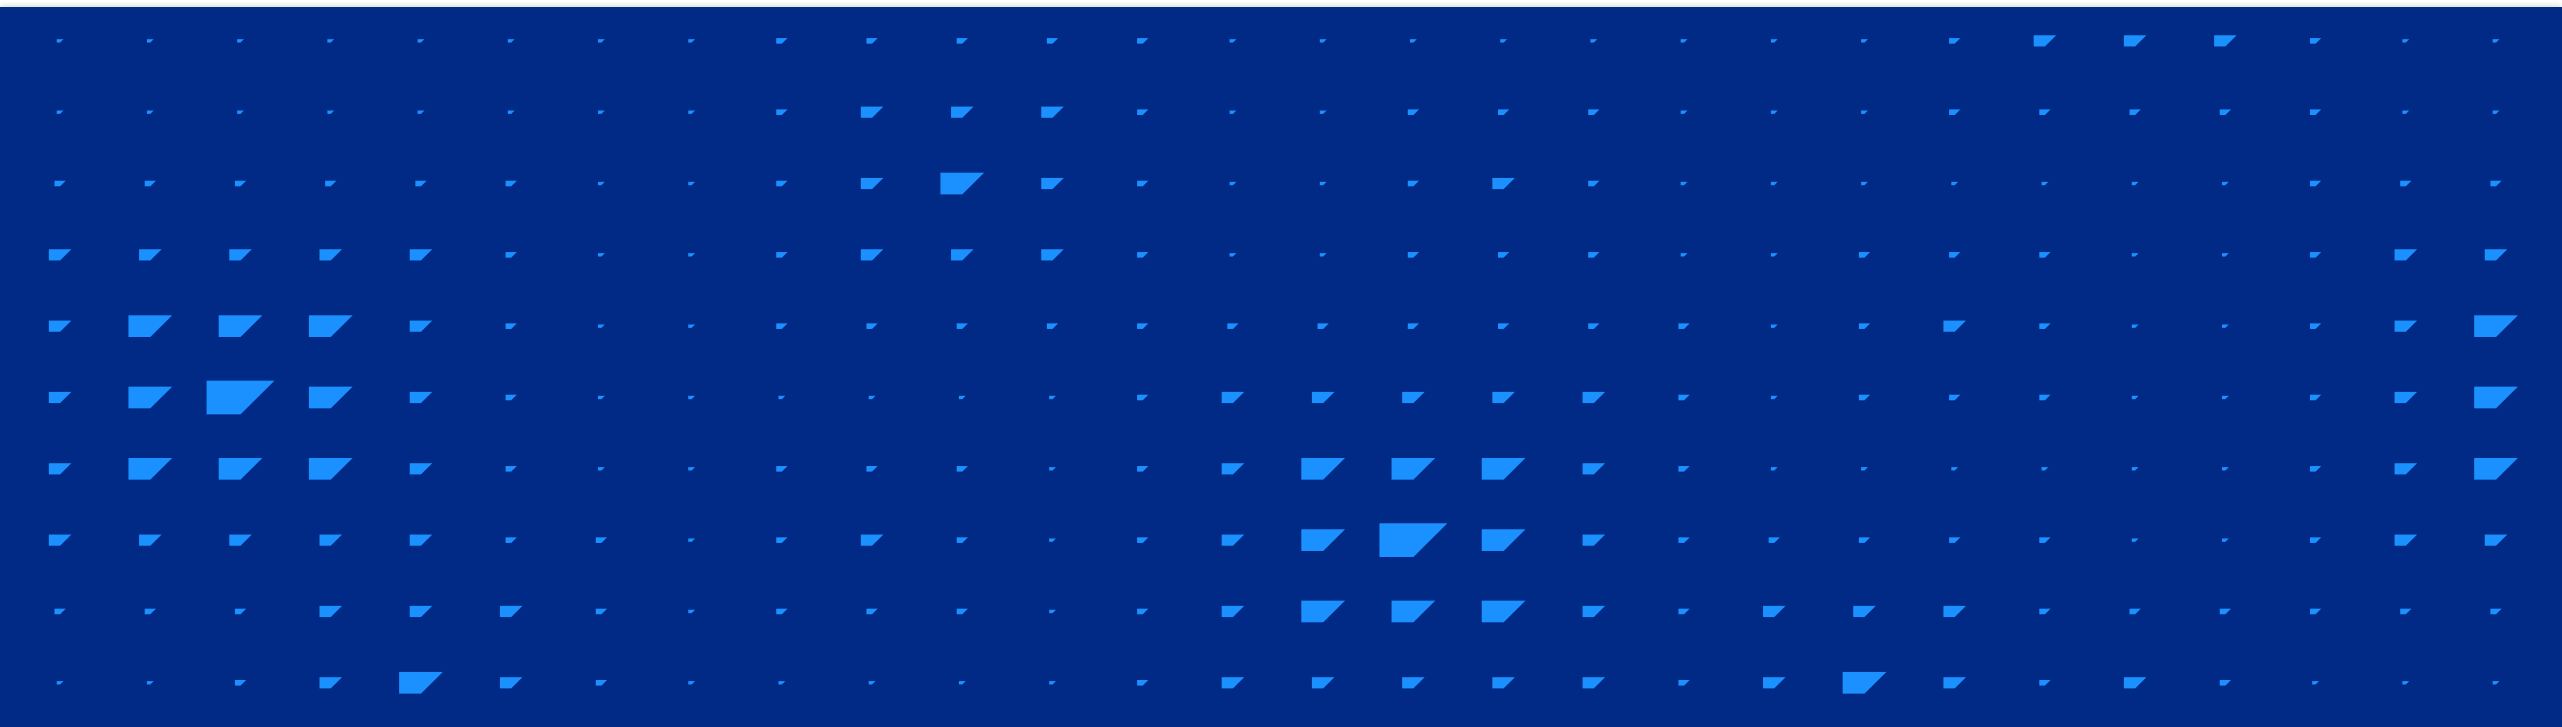

Authentication via **btcli** CLI (experimental)

Demo

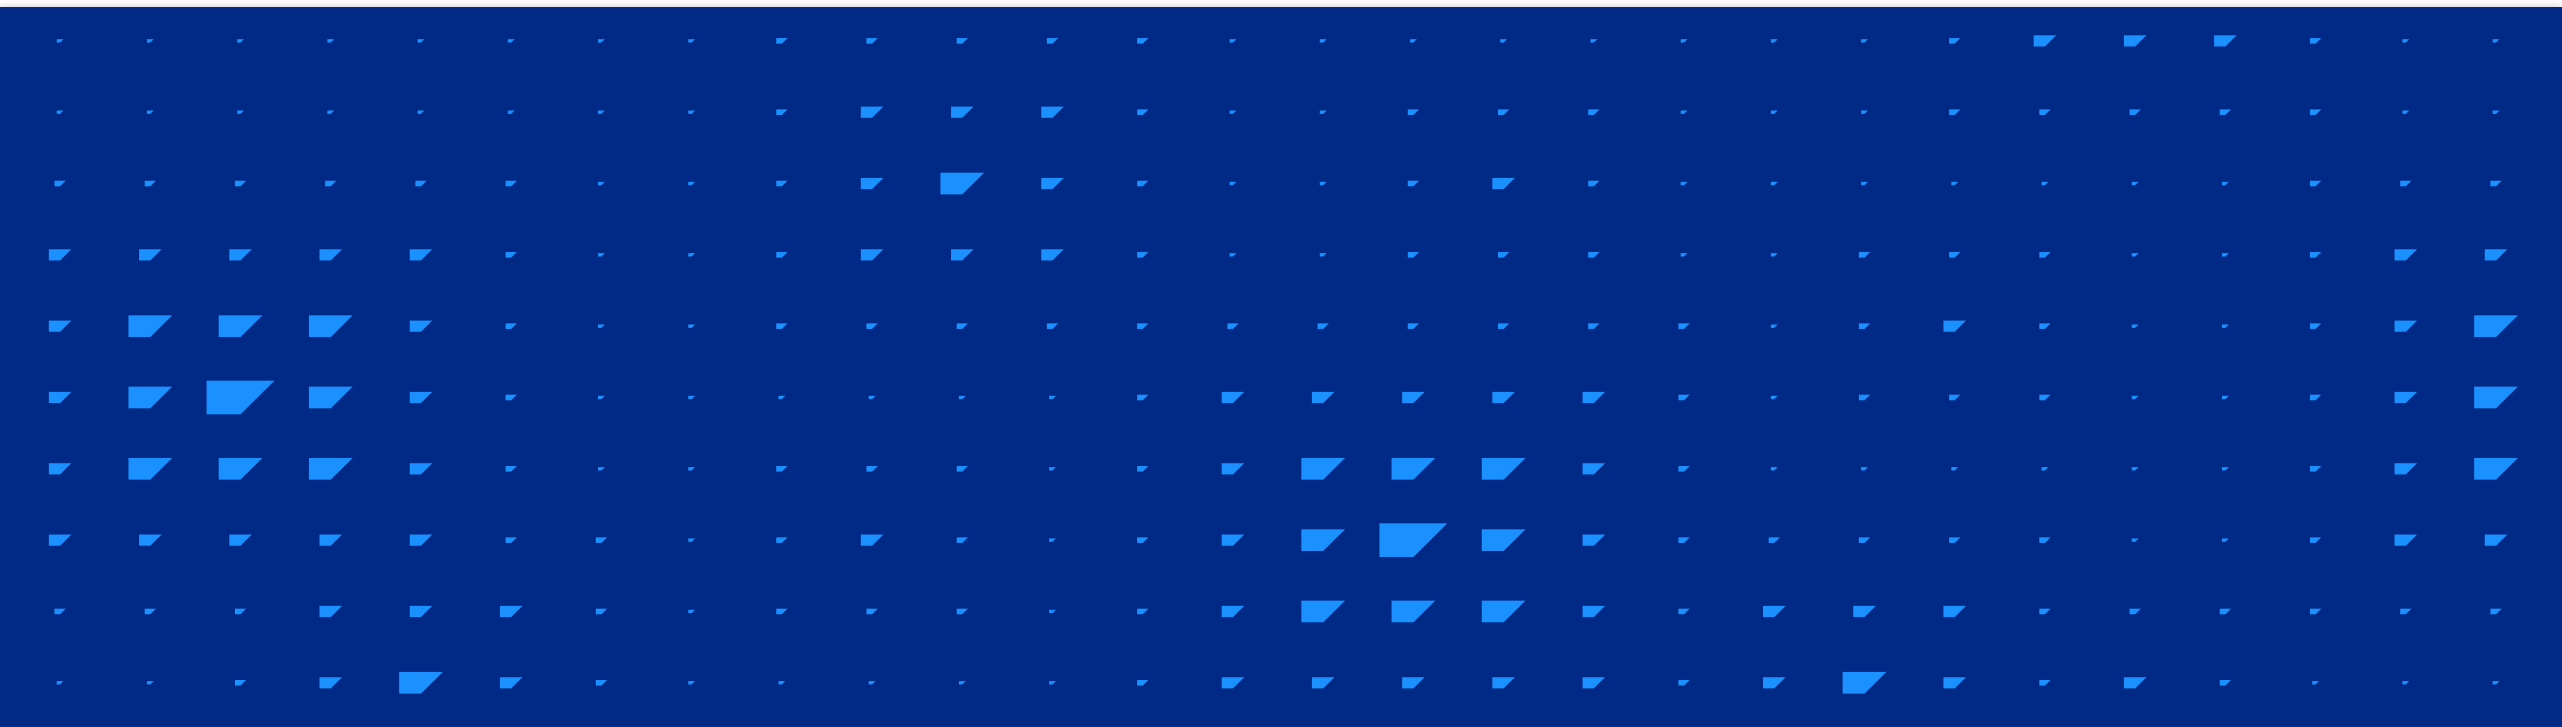

Demo 1 – Terraform provider authentication with btp CLI (experimental)

Demo 2 – BTP Service Instance creation via service offering and service plan name

Demo 3 – Terraform Provider for SAP Cloud Connector

Why a Terraform Provider for SAP Cloud Connector?

”Typical” end-to-end flows include both SAP BTP and SAP Cloud Connector.

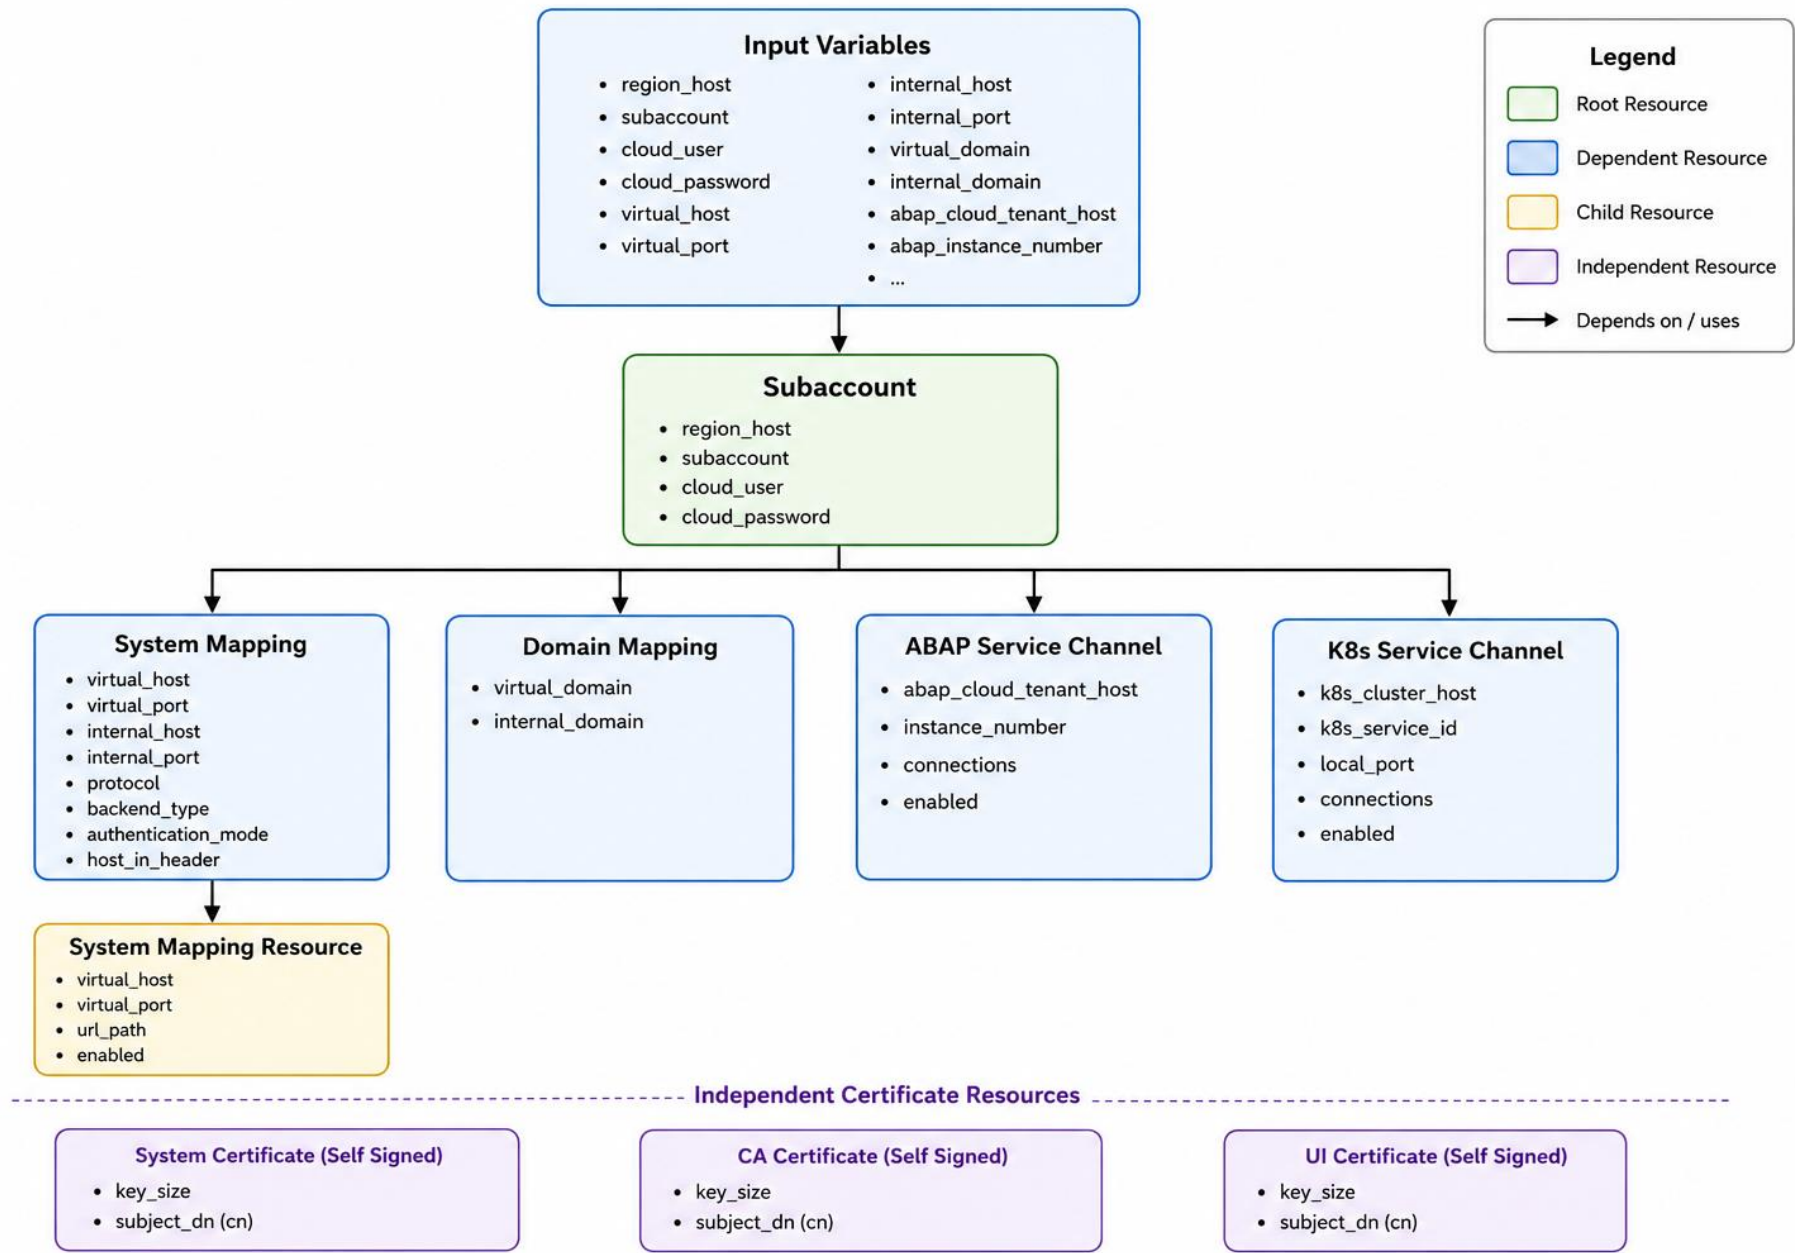

Reflected by the user demand we got after publishing the providers for SAP BTP and Cloud Foundry.

APIs of SAP Cloud Connector fit well with Terraform automation.

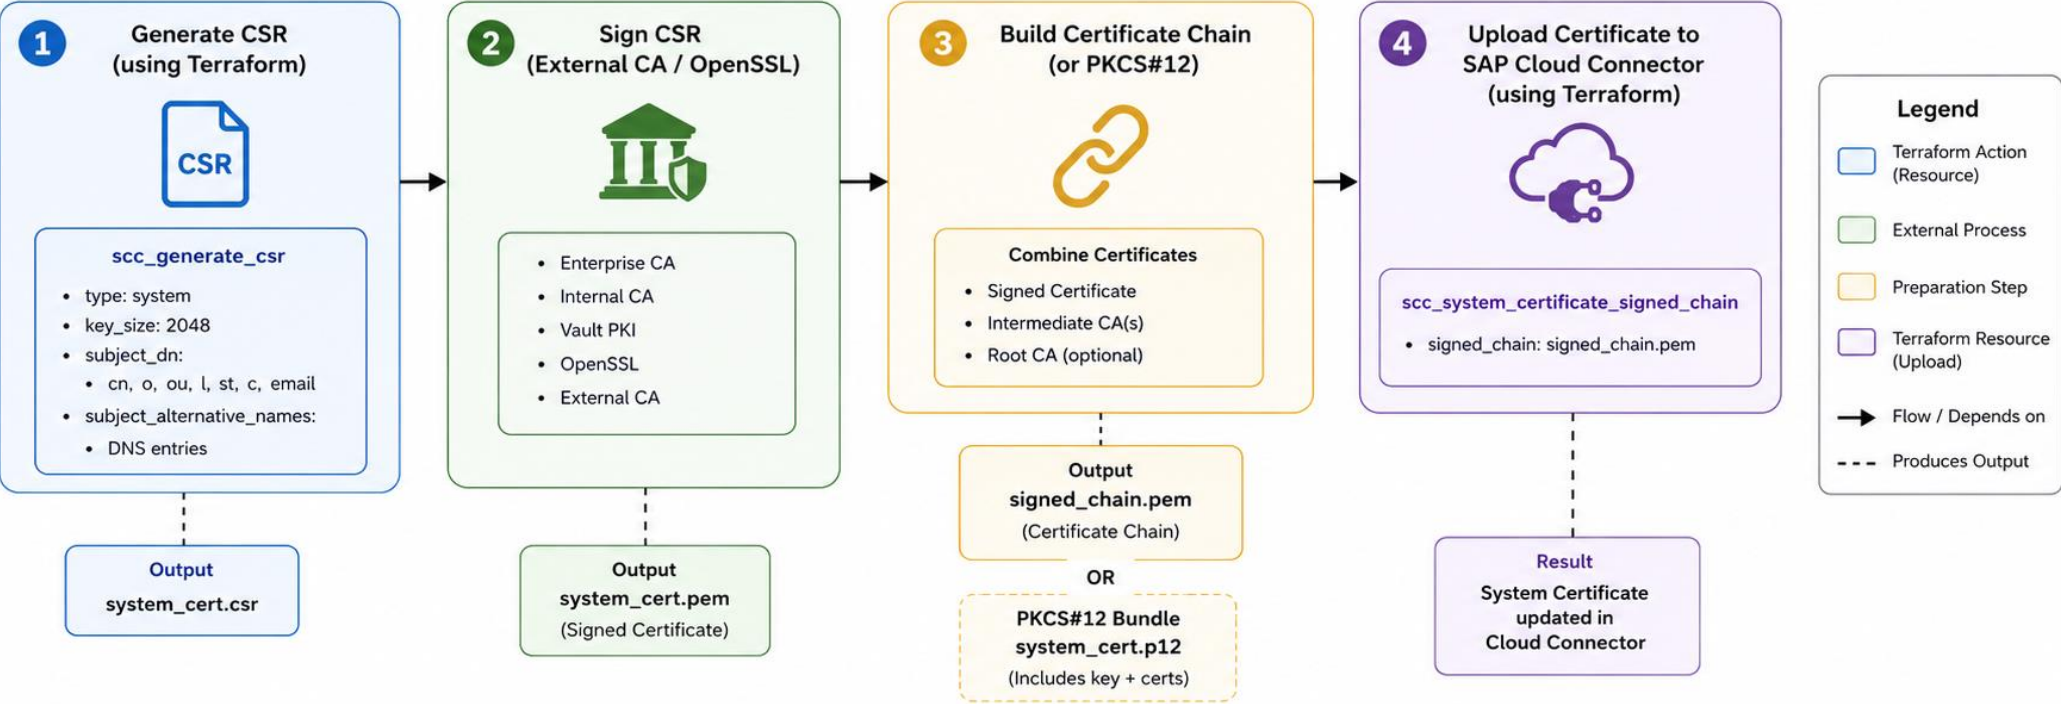

Faster onboarding of subaccounts and systems.
